Setup and configure a LAN using switch and Ethernet.

Aim:-

To set up and configure a local Area Network (LAN) using a switch and Ethernet cables

What is LAN?

A local Area Network (LAN) is a network that connects computers and other devices within a small area.

Requirements:

- 4 computers (PC1 - PC4)
- 1 Network switch
- 4 Ethernet cables.

Ip configuration

PC1 - 10.1.1.1 - 255.0.0.0

Procedure -

1. Connect all four computers to the switch using Ethernet cables.
2. Assign the given static IP addresses to each computer.
3. Configure the switch with IP address 10.1.1.5
4. Check the network connection using the

ping command.

5. Share a folder on one computer with Everyone.
6. Access the shared folder from the other computers on the LAN.
7. Verify that all devices communicate successfully.

Result :-

The LAN was successfully configured using a router and Ethernet cables. All computers communicated successfully
